FOR PROPERTY MANAGERS · MELBOURNE'S EAST

Blocked drain in a rental? Fixed today — with footage that settles who pays.

Same-day drain clearing · CCTV report naming the cause · one fixed price, one clean invoice. Drains only.

I'm Jack, a local plumber who only does drains. Based in Melbourne's south-east and covering Knox, Maroondah, the Ranges, the Yarra Valley and the eastern suburbs, I clear blocked drains in rentals the same day and run a camera down the line afterwards — so your owner and your renter both get the same answer about what caused it, and you're not refereeing.

WHAT YOUR OFFICE GETS

⚡ Same-day on urgent repairs

A blocked drain or toilet is an urgent repair under Victoria's Residential Tenancies Act. You text or email the address and the renter's number; I contact them direct, arrange access and attend the same day wherever I can.

After-hours and weekends available — any surcharge is told to you before I go, not on the invoice.

📷 A report that ends the argument

After every main-line clear the CCTV camera goes down. You get the footage and a short written report naming the cause and where it sits: roots or aged pipe, wipes or fat, or past the boundary.

That's the document that decides owner vs renter vs water authority — emailed to you the same day, good enough for the owner or the tribunal.

🧾 One price, one invoice, no chasing

Fixed price quoted before work starts. No call-out fee in business hours. Invoice goes to the agency or the owner — your call — with the report attached so it approves itself.

Jetting at 5000 PSI with the pressure set for old clay, so the same drain isn't on your list again in six weeks.

What the camera finds	Who it usually lands with	What I give you
Tree roots, aged or collapsed pipe, bellied line	**Owner / rental provider** — structural or wear and tear	Footage + report, repair options quoted in writing (relining where digging isn't wanted)
Wet wipes, fat and oil, foreign objects	**Renter** — misuse	Footage of the material in the line, so the conversation is short
Blockage past the property boundary	**Water authority** (Yarra Valley Water / South East Water)	The distance reading and footage you need to refer it on

✔ **Local, owner-operated — Jack attends every job** ✔ **20+ years on the tools** ⭐ **5.0 from 100+ Google reviews**
✔ **CCTV footage handed over** ✔ **Fixed price before work starts**

Drains only.

Blocked drains, sewers, toilets, sinks, stormwater, CCTV, jetting, relining. No general plumbing — I'm the one you add for drains, alongside whoever you already use for everything else.

Renter-friendly.

I turn up when I say, explain what I found in plain English, and leave the place as I found it. Fewer follow-up calls to your desk.

Older rentals?

A camera check before re-letting a pre-1980s house finds the root-choked sewer before the new renter does. Quoted per property.
