FOR BUILDERS & SITE SUPERVISORS · MELBOURNE'S EAST

Check the drains before you pour.

Pre-slab CCTV · pre-dig drain locating · jetting & clearing on your build. Drains only — I'm not a competitor.

I'm Jack, a local plumber who only does drains. Based in Melbourne's south-east and covering the Dandenong Ranges, the Yarra Valley and the eastern suburbs, I camera and locate the drains under your builds so the pipe problems get found while they cost hundreds — not after the slab is down, when the same defect means cutting concrete with trades stacked behind it.

THREE WAYS I FIT INTO YOUR JOB

🏗️ Pre-slab pour CCTV

Camera run through the under-slab sewer and stormwater after rough-in, before the concrete goes down. Falls, bellies, crushed sections and construction debris checked while they're still fixable.

Most residential slabs are under an hour on site. Time-stamped footage and a written report the same day, formatted for your job file.

📍 Locate & camera before you dig

On extensions, knockdown-rebuilds and renos: existing sewers and stormwater located with a sonde and marked on the ground, then camera-inspected for condition.

You know where the lines run and what state they're in before the excavator turns up — no building over a live drain, no collapsed line found after the pour.

💦 Jetting & clearing on site

5000 PSI hydro jetting for lines fouled with slurry, mortar or offcuts during the build, root cutting on existing drains, and blockages after handover.

CCTV handover footage you can pass to your client as proof the drainage was clear and sound on the day.

	Defect found *before* the pour	Defect found *after* the pour
Cost to fix	**Hundreds** — a quick repair or an on-the-spot jet clear	**Tens of thousands** — concrete cutting or under-slab boring
Your schedule	An inconvenience, fixed without moving the concrete booking	A delay with every following trade pushed back
What you hold	Dated video evidence the drainage was sound at pour day	A dispute over whose trade caused it — with no footage

✔ **Local, owner-operated** ✔ **20+ years on the tools** ⭐ **5.0 from 100+ Google reviews**
✔ **Jack attends every job personally** ✔ **Same-day report & footage** ✔ **Fixed price quoted before work starts**

Drains only.

No general building, no general plumbing. I'm the drain specialist you call in when you need one — not someone who'll talk to your client about their next job.

Happy to be your subby.

I invoice you at my rate and you run it through your job at whatever margin suits. Or I invoice your client direct — your call, job by job.

Fast turnaround.

I'm fully mobile across the east and I work around your pour dates, so I don't hold up the trades behind me.
